Biome Australia Limited and Controlled Entities

ABN 51 627 364 014

Directors' Report

30 June 2020

The directors present their report, together with the financial statements of the Group, being the Company and its controlled entities, for the financial year ended 30 June 2020. The company was incorporated on 6 July 2018, therefore the comparative information is for the period since incorporation.

Directors

The names of the directors in office at any time during, or since the end of, the year are:

Dr Jaroslav Haman Boublik
Douglas Chee Yong Loh
Blair William Brabin Norfolk
Rodney William Unsworth
Michael Sven Ola Oredsson
Ilario Thomas Faenza (appointed on 18 August 2020)

Directors have been in office since the start of the financial year to the date of this report unless otherwise stated.

Principal activities

The principal activities of the Group during the financial year were developing, manufacturing and distributing innovative evidence-based products linking the gut and human health through the Group owned brands:

- Activated Nutrients ®, a range of completely organic, plant-based, all-in-one nutritional products;
- Activated Probiotics ®, a first-of-its-kind range of clinically-backed precision probiotics; and
- AXP™, certified range of performance products for athletes.

Apart from the matters noted below under "significant changes in state of affairs", there was no significant change in the nature of these activities occurred during the year.

Review of operations

The consolidated loss of the Group amounted to \$3,162,163 (2019: \$2,011,986). The results reflect the ongoing significant investment to develop and grow the business. Also, the directors reassessed the carrying value of the original acquired intangibles in the brand Activated Nutrients, that enabled the Group to set up a sales organisation and launch the brand in Australian pharmacies in 2018. This provided a platform for the launch of the Activated Probiotics brand in 2019. Activated Probiotics has replaced Activated Nutrients as the leading brand and now accounts for 90% of sales. Activated Nutrients is now deemed to have marginal value and has been written off.

As the Group's sales history starts to mature, the Group is in a better position to assess and manage the Group's inventory and stock obsolescence. In addition, the adverse trading conditions caused by Covid-19 have resulted in the Group providing \$234,552 for slow moving and obsolete inventory at year end.

Significant changes in state of affairs

During the period, the Group raised additional capital and continued a strategy to develop and grow the business.

Aside from the above, there have been no other significant changes in the state of affairs of entities in the Group during the year.

Biome Australia Limited and Controlled Entities

ABN 51 627 364 014

Directors' Report

30 June 2020

Matters or circumstances arising after the end of the year

Subsequent to year end, the Group has cancelled 33,333,333 performance rights and issued 28,500,000 new performance rights over 3 vesting dates.

Covid-19 has delayed the rollout of products in Australian pharmacies. Lockdowns have affected the speed at which the Group has been able to grow its distribution footprint, which reached about 850 outlets at the date of this report. With the final lifting of lockdowns in Victoria and other states, the Group is confident of being able to consistently grow distribution and sales across Australia in the coming months.

Subsequent to year end, the Group implemented an Employee Share & Option Plan. Staff who accepted salary reductions over a minimum period of 6 months during Covid-19 to support the Group's cash flows were issued compensatory shares under the Employee Share Plan. A total of 4,973,009 shares were issued under the Plan.

The Group also raised a further \$1,016,585 in new equity at \$0.06 per share from existing shareholders to fund its growth.

Apart from this, no other matters or circumstances have arisen since the end of the financial year which significantly affected or could significantly affect the operations of the Group, the results of those operations or the state of affairs of the Group in future financial years.

Future developments and results

Likely developments in the operations of the Group and the expected results of those operations in future financial years have not been included in this report as the inclusion of such information is likely to result in unreasonable prejudice to the Group.

Environmental matters

The Group's operations are not regulated by any significant environmental regulations under a law of the Commonwealth or of a state or territory.

Dividends paid or recommended

No dividends were paid or declared since the start of the financial year. No recommendation for payment of dividends has been made.

Information on directors

| | |
|---------------------------|---|
| Dr Jaroslav Haman Boublik | Director, Chief Science Officer Consultant to the nutritional R&D sector and researcher with over 30 years of experience in nutritional and complementary medicine. Dr. JB is Chief Scientist of LeafCann Group Pty Ltd and CEO of LeafCann Group Research & Advisory. He has published multiple peer-reviewed scientific articles. |
| Douglas Chee Yong Loh | Director, Finance Over 30 years of advisory, accounting and finance, company management and investment management experience. 19 years as founding member of Acorn Capital and held positions as Portfolio Manager, Head of Equities, CFO, COO and Director. Douglas was Chairman of DXN Limited, an ASX listed pre-fabricated modular data centre manufacturer, builder and operator. |
| Special Responsibilities | Company Secretary |

Biome Australia Limited

ABN 51 627 364 014

Notes to the Financial Statements

For the Year Ended 30 June 2020

The financial report covers Biome Australia Limited and its controlled entities ('the Group'). Biome Australia Limited and Controlled Entities is a for-profit Company limited by shares, incorporated and domiciled in Australia.

The company was incorporated on 6 July 2018, therefore the comparative information is for the period since incorporation.

Each of the entities within the Group prepare their financial statements based on the currency of the primary economic environment in which the entity operates (functional currency). The consolidated financial statements are presented in Australian dollars which is the parent entity's functional and presentation currency.

The financial report was authorised for issue by the Directors on 23 November 2020.

1 Basis of Preparation

The financial statements are general purpose financial statements that have been prepared in accordance with the Australian Accounting Standards and the *Corporations Act 2001*.

These financial statements comply with International Financial Reporting Standards as issued by the International Accounting Standards Board.

2 Going concern

During the financial period ended 30 June 2020 the Group incurred an operating loss of \$3,162,163 and a negative cash outflow from operating activities of \$3,220,854.

The financial statements have been prepared on a going concern basis, which contemplates the continuity of normal business activity and the realisation of assets and the settlement of liabilities in the normal course of business. The ability of the Group to continue as a going concern is dependent on securing additional funding through new or existing investors to fund its operational and marketing activities. These conditions indicate a material uncertainty that may cast a significant doubt about the entity's ability to continue as a going concern and, therefore, that it may be unable to realise its assets and discharge its liabilities in the normal course of business.

The Directors believe that the Group will continue as a going concern. As a result, the financial statements has been prepared on a going concern basis. However, should the future fundraising be unsuccessful, the entity may not be able to continue as a going concern. No adjustments have been made relating to the recoverability and classification of assets and classification of liabilities that might be necessary should the Group not continue as a going concern.

3 Summary of Significant Accounting Policies

(a) Principles of consolidation

The consolidated financial statements include the financial position and performance of controlled entities from the date on which control is obtained until the date that control is lost.

Intragroup assets, liabilities, equity, income, expenses and cashflows relating to transactions between entities in the consolidated entity have been eliminated in full for the purpose of these financial statements.

Appropriate adjustments have been made to a controlled entity's financial position, performance and cash flows where the accounting policies used by that entity were different from those adopted by the consolidated entity. All controlled entities have a June financial year end.

A list of controlled entities is contained in Note 22 to the financial statements.

Notes to the Financial Statements

For the Year Ended 30 June 2020

3 Summary of Significant Accounting Policies (continued)

(b) Revenue from contracts with customers

The core principle of AASB 15 is that revenue is recognised on a basis that reflects the transfer of promised goods or services to customers at an amount that reflects the consideration the Group expects to receive in exchange for those goods or services. Revenue is recognised by applying a five-step model as follows:

1. Identify the contract with the customer
2. Identify the performance obligations
3. Determine the transaction price
4. Allocate the transaction price to the performance obligations
5. Recognise revenue as and when control of the performance obligations is transferred

Generally the timing of the payment for sale of goods and rendering of services corresponds closely to the timing of satisfaction of the performance obligations, however where there is a difference, it will result in the recognition of a receivable, contract asset or contract liability.

None of the revenue streams of the Group have any significant financing terms as there is less than 12 months between receipt of funds and satisfaction of performance obligations.

Specific revenue streams

The revenue recognition policies for the principal revenue streams of the Group are:

Sale of goods

Revenue from the sale of goods is recognised at the point in time when the customer obtains control of the goods, which is generally at the time of delivery.

Research and development tax incentive grants

Research and Development tax incentive grants are recognised when they are probable of recovery and the amounts can be reliably measured, which presently is in the year when the claim is received.

Interest

Interest revenue is recognised as interest accrues using the effective interest method. This is a method of calculating the amortised cost of a financial asset and allocating the interest income over the relevant period using the effective interest rate, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the net carrying amount of the financial asset.

Other revenue

Other revenue is recognised when it is received or when the right to receive payment is established.

Notes to the Financial Statements

For the Year Ended 30 June 2020

3 Summary of Significant Accounting Policies (continued)

(c) Income Tax

The tax expense recognised in the statement of profit or loss and other comprehensive income comprises current income tax expense plus deferred tax expense.

Current tax is the amount of income taxes payable (recoverable) in respect of the taxable profit (loss) for the year and is measured at the amount expected to be paid to (recovered from) the taxation authorities, using the tax rates and laws that have been enacted or substantively enacted by the end of the reporting period. Current tax liabilities (assets) are measured at the amounts expected to be paid to (recovered from) the relevant taxation authority.

Deferred tax is provided on temporary differences which are determined by comparing the carrying amounts of tax bases of assets and liabilities to the carrying amounts in the consolidated financial statements.

Deferred tax is not provided for the following:

- The initial recognition of an asset or liability in a transaction that is not a business combination and at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).
- Taxable temporary differences arising on the initial recognition of goodwill.
- Temporary differences related to investment in subsidiaries, associates and jointly controlled entities to the extent that the Group is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets are recognised for all deductible temporary differences and unused tax losses to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and losses can be utilised.

Current and deferred tax is recognised as income or an expense and included in profit or loss for the period except where the tax arises from a transaction which is recognised in other comprehensive income or equity, in which case the tax is recognised in other comprehensive income or equity respectively.

(d) Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised as part of the cost of that asset.

All other borrowing costs are recognised as an expense in the period in which they are incurred.

(e) Goods and services tax (GST)

Revenue, expenses and assets are recognised net of the amount of goods and services tax (GST), except where the amount of GST incurred is not recoverable from the Australian Taxation Office (ATO).

Receivables and payable are stated inclusive of GST.

Notes to the Financial Statements

For the Year Ended 30 June 2020

3 Summary of Significant Accounting Policies (continued)

(e) Goods and services tax (GST) (continued)

Cash flows in the statement of cash flows are included on a gross basis and the GST component of cash flows arising from investing and financing activities which is recoverable from, or payable to, the taxation authority is classified as operating cash flows.

(f) Inventories

Inventories are measured at the lower of cost and net realisable value. Cost of inventory is determined using the first-in-first-out basis and is net of any rebates and discounts received. Net realisable value is estimated using the most reliable evidence available at the reporting date and inventory is written down through an obsolescence provision if necessary.

(g) Property, plant and equipment

Each class of property, plant and equipment is carried at cost or fair value less, where applicable, any accumulated depreciation and impairment.

Depreciation

Property, plant and equipment, excluding freehold land, is depreciated on a straight-line basis over the assets useful life to the Group, commencing when the asset is ready for use.

Leased assets and leasehold improvements are amortised over the shorter of either the unexpired period of the lease or their estimated useful life.

The depreciation rates used for each class of depreciable asset are shown below:

| Fixed asset class | Depreciation rate |
|----------------------------------|--------------------------|
| Furniture, Fixtures and Fittings | 50% |
| Motor Vehicles | 25% |
| Leasehold improvements | 30% |
| Medical and diagnostic equipment | 50% |

At the end of each annual reporting period, the depreciation method, useful life and residual value of each asset is reviewed. Any revisions are accounted for prospectively as a change in estimate.

(h) Financial instruments

Financial instruments are recognised initially on the date that the Group becomes party to the contractual provisions of the instrument.

On initial recognition, all financial instruments are measured at fair value plus transaction costs (except for instruments measured at fair value through profit or loss where transaction costs are expensed as incurred).

Notes to the Financial Statements

For the Year Ended 30 June 2020

3 Summary of Significant Accounting Policies (continued)

(h) Financial instruments (continued)

Financial assets

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

Amortised cost

Assets measured at amortised cost are financial assets where:

- the business model is to hold assets to collect contractual cash flows; and
- the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

The Group's financial assets measured at amortised cost comprise trade and other receivables and cash and cash equivalents in the statement of financial position.

Subsequent to initial recognition, these assets are carried at amortised cost using the effective interest rate method less provision for impairment.

Interest income, foreign exchange gains or losses and impairment are recognised in profit or loss. Gain or loss on derecognition is recognised in profit or loss.

Trade receivables and contract assets

Impairment of trade receivables and contract assets have been determined using the simplified approach in AASB 9 which uses an estimation of lifetime expected credit losses. The Group has determined the probability of non-payment of the receivable and multiplied this by the amount of the expected loss arising from default.

The amount of the impairment is recorded in a separate allowance account with the loss being recognised in finance expense. Once the receivable is determined to be uncollectable then the gross carrying amount is written off against the associated allowance.

Where the Group renegotiates the terms of trade receivables due from certain customers, the new expected cash flows are discounted at the original effective interest rate and any resulting difference to the carrying value is recognised in profit or loss.

Financial liabilities

The Group measures all financial liabilities initially at fair value less transaction costs, subsequently financial liabilities are measured at amortised cost using the effective interest rate method.

The financial liabilities of the Group comprise trade payables, bank and other loans and lease liabilities.

Hedge accounting

The group does not enter into foreign exchange contracts.

Notes to the Financial Statements

For the Year Ended 30 June 2020

3 Summary of Significant Accounting Policies (continued)

(i) Impairment of non-financial assets

At the end of each reporting period the Group determines whether there is an evidence of an impairment indicator for non-financial assets.

Where an indicator exists and regardless for goodwill, indefinite life intangible assets and intangible assets not yet available for use, the recoverable amount of the asset is estimated.

Where assets do not operate independently of other assets, the recoverable amount of the relevant cash-generating unit (CGU) is estimated.

The recoverable amount of an asset or CGU is the higher of the fair value less costs of disposal and the value in use. Value in use is the present value of the future cash flows expected to be derived from an asset or cash-generating unit.

Where the recoverable amount is less than the carrying amount, an impairment loss is recognised in profit or loss.

Reversal indicators are considered in subsequent periods for all assets which have suffered an impairment loss, except for goodwill.

(j) Intangibles

Trademarks/ Business and Domain Names

Trademarks/business and domain names are initially recognised at cost of acquisition. They are amortised over a useful life of 20 years and are tested annually for impairment and carried at cost less any impairment losses.

(k) Cash and cash equivalents

Cash and cash equivalents comprises cash on hand, demand deposits and short-term investments which are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value.

(l) Leases

For comparative year

Lease payments for operating leases, where substantially all of the risks and benefits remain with the lessor, are charged as expenses on a straight-line basis over the life of the lease term.

Lease incentives under operating leases are recognised as a liability and amortised on a straight-line basis over the life of the lease term.

For current year

At inception of a contract, the Group assesses whether a lease exists - i.e. does the contract convey the right to control the use of an identified asset for a period of time in exchange for consideration.

This involves an assessment of whether:

Notes to the Financial Statements

For the Year Ended 30 June 2020

3 Summary of Significant Accounting Policies (continued)

(l) Leases (continued)

- The contract involves the use of an identified asset - this may be explicitly or implicitly identified within the agreement. If the supplier has a substantive substitution right then there is no identified asset.
- The Group has the right to obtain substantially all of the economic benefits from the use of the asset throughout the period of use.
- The Group has the right to direct the use of the asset i.e. decision making rights in relation to changing how and for what purpose the asset is used.

At the lease commencement, the Group recognises a right-of-use asset and associated lease liability for the lease term. The lease term includes extension periods where the Group believes it is reasonably certain that the option will be exercised.

The right-of-use asset is measured using the cost model where cost on initial recognition comprises of the lease liability, initial direct costs, prepaid lease payments, estimated cost of removal and restoration less any lease incentives received.

The right-of-use asset is depreciated over the lease term on a straight line basis and assessed for impairment in accordance with the impairment of assets accounting policy.

The lease liability is initially measured at the present value of the remaining lease payments at the commencement of the lease. The discount rate is the rate implicit in the lease, however where this cannot be readily determined then the Group's incremental borrowing rate is used.

Subsequent to initial recognition, the lease liability is measured at amortised cost using the effective interest rate method. The lease liability is remeasured whether there is a lease modification, change in estimate of the lease term or index upon which the lease payments are based (e.g. CPI) or a change in the Group's assessment of lease term.

Where the lease liability is remeasured, the right-of-use asset is adjusted to reflect the remeasurement or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

Exceptions to lease accounting

The Group has elected to apply the exceptions to lease accounting for both short-term leases (i.e. leases with a term of less than or equal to 12 months) and leases of low-value assets. The Group recognises the payments associated with these leases as an expense on a straight-line basis over the lease term.

(m) Share-based payments

The Group operates equity-settled share-based payment share and option schemes. The fair value of the equity is measured at grant date and recognised as an expense over the vesting period, with a corresponding increase to an equity account. The fair value of shares is ascertained as the market bid price. The fair value of options is ascertained using a industry standard pricing model which incorporates all market vesting conditions. The amount to be expensed is determined by reference to the fair value of the options or shares granted, this expense takes in account any market performance conditions and the impact of any non-vesting conditions but ignores the effect of any service and non-market performance vesting conditions.

Non-market vesting conditions are taken into account when considering the number of options expected to vest.

Notes to the Financial Statements

For the Year Ended 30 June 2020

3 Summary of Significant Accounting Policies (continued)

(m) Share-based payments (continued)

At the end of each reporting period, the Group revises its estimate of the number of options which are expected to vest based on the non-market vesting conditions. Revisions to the prior period estimate are recognised in profit or loss and equity.

(n) Foreign currency transactions and balances

Transaction and balances

Foreign currency transactions are recorded at the spot rate on the date of the transaction.

At the end of the reporting period:

- Foreign currency monetary items are translated using the closing rate;
- Non-monetary items that are measured at historical cost are translated using the exchange rate at the date of the transaction; and
- Non-monetary items that are measured at fair value are translated using the rate at the date when fair value was determined.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition or in prior reporting periods are recognised through profit or loss, except where they relate to an item of other comprehensive income or whether they are deferred in equity as qualifying hedges.

(o) Adoption of new and revised accounting standards

The Group has adopted all standards which became effective for the first time at 30 June 2020, the adoption of these standards has not caused any material adjustments to the reported financial position, performance or cash flow of the Group.

New and revised Standards and amendments thereof and Interpretations effective for the current year that are relevant to the Group include:

- AASB 16, Leases

Leases - Adoption of AASB 16

The Company has adopted AASB 16 Leases using the modified retrospective (cumulative catchup) method from 1 July 2019 and therefore the comparative information for the year ended 30 June 2019 has not been restated and has been prepared in accordance with AASB 117 Leases and associated Accounting Interpretations.

Impact of Adoption of AASB 16

Company as a lessee

Under AASB 117, the Company assessed whether leases were operating or finance leases based on its assessment of whether the significant risks and rewards of ownership had been transferred to the Company or

Notes to the Financial Statements

For the Year Ended 30 June 2020

3 Summary of Significant Accounting Policies (continued)

(o) Adoption of new and revised accounting standards (continued)

remained with the lessor. Under AASB 16, there is no differentiation between finance and operating leases for the lessee and therefore all leases which meet the definition of a lease are recognised on the statement of financial position (except for short-term leases and leases of low value assets).

The Company has elected to use the exception to lease accounting for short-term leases and leases of low value assets, and the lease expense relating to these leases are recognised in the statement of profit or loss on a straight-line basis.

Practical expedients used on transition

AASB 16 includes a number of practical expedients which can be used on transition, the Company has used the following expedients:

- contracts which had previously been assessed as not containing leases under AASB 117 were not reassessed on transition to AASB 16;
- lease liabilities have been discounted using the Company's incremental borrowing rate at 1 July 2019;
- right-of-use assets at 1 July 2019 have been measured at an amount equal to the lease liability adjusted by the amount of any prepaid or accrued lease payments;
- a single discount rate was applied to all leases with similar characteristics.

See Note 3(l) for further details.

(p) Reclassification of comparatives

Comparative balances have been remapped or reclassified where relevant to aid understandability. The net prior year result or position of the Group has not changed as a result of these adjustments.

4 Critical Accounting Estimates and Judgments

The directors make estimates and judgements during the preparation of these financial statements regarding assumptions about current and future events affecting transactions and balances.

These estimates and judgements are based on the best information available at the time of preparing the financial statements, however as additional information is known then the actual results may differ from the estimates.

The significant estimates and judgements made have been described below.

Key estimates - receivables

The receivables at reporting date have been reviewed to determine whether there is any objective evidence that any of the receivables are impaired. An impairment provision is included for any receivable where the entire balance is not considered collectible. The impairment provision is based on the best information at the reporting date.

Notes to the Financial Statements

For the Year Ended 30 June 2020

4 Critical Accounting Estimates and Judgments (continued)

Key estimates - provision for impairment of inventories

The provision for impairment of inventories assessment requires a degree of estimation and judgement. The level of the provision is assessed by taking into account the recent sales experience, the ageing of inventories and other factors that affect inventory obsolescence.

Key estimates - impairment of non-financial assets

Intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. Other non-financial assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount.

Recoverable amount is the higher of an asset's fair value less costs of disposal and value-in-use. The value-in-use is the present value of the estimated future cash flows relating to the asset using a pre-tax discount rate specific to the asset or cash-generating unit to which the asset belongs. Assets that do not have independent cash flows are grouped together to form a cash-generating unit.

Key estimates - income tax

The Group is subject to income taxes in the jurisdictions in which it operates. Significant judgement is required in determining the provision for income tax. There are many transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. The Group recognises liabilities for anticipated tax audit issues based on the Group's current understanding of the tax law. Where the final tax outcome of these matters is different from the carrying amounts, such differences will impact the current and deferred tax provisions in the period in which such determination is made.

Key estimates - recovery of deferred tax assets

Deferred tax assets are recognised for deductible temporary differences only if the Group considers it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

| Government subsidies receivable | 83,000 | - |
| Other receivables | 1,721 | - |
| | 276,993 | 250,464 |

The carrying value of trade receivables is considered a reasonable approximation of fair value due to the short-term nature of the balances.

Biome Australia Limited

ABN 51 627 364 014

Notes to the Financial Statements For the Year Ended 30 June 2020

10 Trade and Other Receivables (continued)

The maximum exposure to credit risk at the reporting date is the fair value of each class of receivable in the financial statements.

(a) Impairment of receivables

The Group applies the simplified approach to providing for expected credit losses prescribed by AASB 9, which permits the use of the lifetime expected loss provision for all trade receivables. To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and the days past due. The loss allowance provision as at 30 June 2020 includes expected credit losses incorporating forward looking information.

(a) Ordinary shares

The holders of ordinary shares are entitled to participate in dividends and the proceeds on winding up of the Company. On a show of hands at meetings of the Company, each holder of ordinary shares has one vote in person or by proxy, and upon a poll each share is entitled to one vote.

The Company does not have authorised capital or par value in respect of its shares.

(b) Capital Management

The key objectives of the Company when managing capital is to safeguard its ability to continue as a going concern and maintain optimal benefits to stakeholders. The Company defines capital as its equity and net debt.

There has been no change to capital risk management policies during the year.

The Company manages its capital structure and makes funding decisions based on the prevailing economic environment and has a number of tools available to manage capital risk. These include maintaining a diversified debt portfolio, the ability to adjust the size and timing of dividends paid to shareholders and the issue of new shares.

The Board monitors a range of financial metrics including return on capital employed and gearing ratios. A key

17 Issued Capital (continued)

(b) Capital Management (continued)

objective of the Company's capital risk management is to maintain compliance with the covenants attached to the Company's debts. Throughout the year, the Company has complied with these covenants.

18 Capital and Leasing Commitments

(a) Operating Leases

The Group currently has an operating lease for premises for \$8,500 per month, with 6 month renewal terms, however either party can terminate the lease with 3 months notice.

(b) Contracted Commitments

The Group does not have any contracted commitments as at 30 June 2020.

19 Financial Risk Management

The Group is exposed to a variety of financial risks through its use of financial instruments.

The Group's overall risk management plan seeks to minimise potential adverse effects due to the unpredictability of financial markets.

The most significant financial risks to which the Group is exposed to are described below:

Specific risks

- Liquidity risk
- Credit risk
- Market risk - currency risk, interest rate risk and price risk

Financial instruments used

The principal categories of financial instrument used by the Group are:

- Trade receivables
- Cash at bank
- Bank overdraft
- Trade and other payables
- Lease liabilities

Notes to the Financial Statements

For the Year Ended 30 June 2020

19 Financial Risk Management (continued)

Objectives, policies and processes

The Board of Directors have overall responsibility for the establishment of the Group's financial risk management framework. This includes the development of policies covering specific areas such as foreign exchange risk, interest rate risk, liquidity risk, credit risk and the use of derivatives.

Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities.

The day-to-day risk management is carried out by the Group's finance function under policies and objectives which have been approved by the Board of Directors. The Chief Financial Officer has been delegated the authority for designing and implementing processes which follow the objectives and policies. This includes monitoring the levels of exposure to interest rate and foreign exchange rate risk and assessment of market forecasts for interest rate and foreign exchange movements.

The Board of Directors receives monthly reports which provide details of the effectiveness of the processes and policies in place.

Mitigation strategies for specific risks faced are described below:

Liquidity risk

Liquidity risk arises from the Group's management of working capital and where applicable, the finance charges and principal repayments on its debt instruments. It is the risk that the Group will encounter difficulty in meeting its financial obligations as they fall due.

The Group's policy is to ensure that it will always have sufficient cash to allow it to meet its liabilities as and when they fall due.

The Group manages its liquidity needs by carefully monitoring, where applicable, scheduled debt servicing payments for long-term financial liabilities as well as cash-outflows due in day-to-day business.

Notes to the Financial Statements

For the Year Ended 30 June 2020

19 Financial Risk Management (continued)

Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in a financial loss to the Group.

Credit risk arises from cash and cash equivalents, deposits with banks and financial institutions, as well as credit exposure to wholesale and retail customers, including outstanding receivables and committed transactions.

The credit risk for liquid funds and other short-term financial assets is considered negligible, since the counterparties are reputable banks with high quality external credit ratings.

Trade receivables and contract assets

Ongoing credit evaluation is performed on the financial condition of accounts receivable.

The Group has adopted a policy of only dealing with creditworthy counterparties as a means of mitigating the risk of financial loss from defaults.

Management considers that all the financial assets that are not impaired for each of the reporting dates under review are of good credit quality, including those that are past due.

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices.

(i) Foreign exchange risk

Exposure to foreign exchange risk may result in the fair value or future cash flows of a financial instrument fluctuating due to movement in foreign exchange rates of currencies in which the Group holds financial instruments which are other than the AUD functional currency of the Group.

Exposures to currency exchange rates arise from the Group's overseas purchases, which are primarily denominated in Euro and US dollars.

To mitigate the Group's exposure to foreign currency risk, non-Australian Dollar cash flows are monitored in accordance with the Group's risk management policies.

The Group does not enter into forward exchange contracts. The implications of this decision are that realised and unrealised foreign exchange gains and losses are recognised in profit and loss in the period in which they occur.

Foreign currency denominated financial assets and liabilities, translated into Australian Dollars at the closing rate, are as follows:

Trade payables in Euro is equivalent of AUD \$133,303.

(ii) Interest rate risk

The Group is exposed to interest rate risk as funds are borrowed at floating and fixed rates. Borrowings issued at fixed rates expose the Group to fair value interest rate risk.

Biome Australia Limited

ABN 51 627 364 014

Notes to the Financial Statements For the Year Ended 30 June 2020

19 Financial Risk Management (continued)

(iii) Price risk

The Group is not exposed to any significant price risk.

20 Key Management Personnel Remuneration

Directors

Biome Australia Limited

ABN 51 627 364 014

Notes to the Financial Statements

For the Year Ended 30 June 2020

28 Events Occurring After the Reporting Date

Subsequent to year end, the Group has cancelled 33,333,333 performance rights and issued 28,500,000 new performance rights over 3 vesting dates.

Covid-19 has delayed the rollout of products in Australian pharmacies. Lockdowns have affected the speed at which the Group has been able to grow its distribution footprint, which reached about 850 outlets at the date of this report. With the final lifting of lockdowns in Victoria and other states, the Group is confident of being able to consistently grow distribution and sales across Australia in the coming months.

Subsequent to year end, the Group implemented an Employee Share & Option Plan. Staff who accepted salary reductions over a minimum period of 6 months during Covid-19 to support the Group's cash flows were issued compensatory shares under the Employee Share Plan. A total of 4,973,009 shares were issued under the Plan.

The Group also raised a further \$1,016,585 in new equity at \$0.06 per share from existing shareholders to fund its growth.

Apart from this, no other matters or circumstances have arisen since the end of the financial year which significantly affected or could significantly affect the operations of the Group, the results of those operations or the state of affairs of the Group in future financial years.

Directors' Declaration

The directors of the Company declare that:

1. the financial statements and notes for the year ended 30 June 2020 are in accordance with the *Corporations Act 2001* and:
 - a. comply with Accounting Standards, which, as stated in basis of preparation Note 1 to the financial statements, constitutes explicit and unreserved compliance with International Financial Reporting Standards (IFRS); and
 - b. give a true and fair view of the financial position and performance of the consolidated group;
2. In the directors' opinion, there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.

This declaration is made in accordance with a resolution of the Board of Directors.

Director

Douglas Chee Yong Loh

Dated 23 November 2020

BIOME AUSTRALIA LIMITED
ABN: 51 627 364 014**INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF**
BIOME AUSTRALIA LIMITED**Report on the audit of the financial report****Opinion**

We have audited the accompanying financial report, being a general purpose financial report of Biome Australia Limited (the Company) and Controlled entities (the Group), which comprises the consolidated statement of financial position as at 30 June 2020, the consolidated statement of profit or loss and comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the period then ended, notes comprising a summary of significant accounting policies and other explanatory information, and the directors' declaration.

In our opinion, the financial report of the Company and Controlled entities is in accordance with the *Corporations Act 2001*, including:

- (a) giving a true and fair view of the Group's financial position as at 30 June 2020 and of its performance for the period ended on that date; and
- (b) complying with Australian Accounting Standards and the *Corporations Regulations 2001*.

Basis for Opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report. We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Material Uncertainty Related to Going Concern

We draw your attention to Note 2 (Going Concern) in the financial report, which indicates the Group incurred an operating loss of \$3,162,163 and a negative cash outflow from operating activities of \$3,220,854.

As stated in Note 2, this event or condition, along with other matters as set forth in Note 2, indicate that a material uncertainty exists that may cast doubt on the Group's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Other Information

The directors are responsible for the other information. The other information comprises the information included in the Group's annual report for the year ended 30 June 2020 but does not include the financial report and our auditor's report thereon.

Our opinion on the financial report does not cover the other information and accordingly we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Financial Report

The directors of the Company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, directors are responsible for assessing the Group's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial report.

Further description of our responsibilities for the audit of the financial report is located at The Auditing and Assurance Standards Board Website at <http://www.auasb.gov.au/Home.aspx>. This description forms part of our auditor's report.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
